

## Professional Summary

*A software engineer proficient in **web development** and seasoned in cross-departmental, cross-cultural **project management**. With a background in software product management, my career has refined technical skills and elevated **communication within diverse teams**. Extensive project management experience has honed my ability to efficiently communicate with non-engineering departments, demonstrating a keen understanding of **time and resource management**.*

## SKILLS

- React / Redux / HTML / CSS / Express/ PostgreSQL/ Sequelize/ MongoDB / REST API / Docker / Git / Jira
- Programming Language: Javascript / Python
- Natural Language: Mandarin / English

## PROFESSIONAL EXPERIENCE

**Web Application Developer | Qualys - Cybersecurity services provider** Foster City, CA | Sep 2022 - Now

- Collaborate with Automation and QA Engineers to enhance security scanning products through intentional vulnerability app development for tests.
- Utilized Node.js to develop full-stack applications, replicating customer website behaviors. Construct experimental environments, utilizing Express, React, PHP, Hyperapp, MongoDB, and Docker.

**Project Specialist | Supermicro** San Jose, CA | Nov 2019 - Sep 2020

- Led a project of a total of 12 products for renewing the 2020 Europe Safety Compliance Regulation. Successfully reduced the risk of delays by negotiating lead time and rescheduling the shipment of important parts.

**Product Planner | FLNET Corporation- FOXCONN Group** Taipei, Taiwan | Aug 2017 - Apr 2019

Product: BANDOTT - Android TV platform built-in smart TV setup box which was one of Netflix's partners in Taiwan

- Managed 7 apps to gain subscriptions and revenues, executed strategies with a positive influence on pay rate; for example
  - By shortening the video trial time, a roughly 10% increase is achieved, and
  - By placing the subscribe button at a consumer-friendlier spot has brought in over 10% in growth.

## PROJECT

**Catniip** (ExpressJS, Sequelize, ReactJS, Redux, CSS, Git, Heroku)

[Website](#)

- Integrate Google OAuth2 for social login, ensuring a smooth onboarding process. Fortify with forced HTTPS redirection, CSRF protection, and password hashing.
- Implement CRUD with REST API for login, cart management, order placement, and review sharing. The combination of ExpressJS, Sequelize, React, and Redux ensures a dynamic user interface.
- Develop an efficient, scalable relational database schema for optimal performance
- Elevate product presentation using AWS S3 for photo uploads.

## EDUCATION & CERTIFICATE

**Web Development - App Academy | 2021 - 2022**

*Conquered a challenging 1000-hour software engineering bootcamp with a <3% acceptance rate. My standout attributes include an unwavering determination to excel and a quick grasp of new concepts, allowing me to thrive in fast-paced environments.*

**Project Management Professional (PMP) - Project Management Institute | Issued Dec 2020**
